Server pricing

- Shared hosting-part of a large server (cheapest method)- \$4/mo
- Virtual servers-\$50/mo, virtually get own server, full mgmt
- Or our own server- about \$200/mo
- For now, Just Host or Site5 for \$4/mo easiest way to do it
- we don't control server, but we control our section (set username and password for C panel), for wordpress and blog we control everything
- can't host videos
- will need to email tech support for certain controls
- only one username/password for back end
- We don't need a lot of space right now, just need to get site off JoeS. Server

WebSite

- simplify
- Rufus and Kelly need to discuss
- Then we can have a brief meeting as a group to settle on aesthetics and function
- Rufus and JoeS. will meet up to discuss

Reminder: Webinar, Wed. June 20 3-4pm <http://metro.org/events/208/>
